- Experience using a plethora of general-purpose programming languages including:
 - Java
 - Python
 - HTML/CSS
 - JavaScript
- Excellent understanding of agile programming processes
- Experience dealing with customers both face to face and remotely
- 3.0+ GPA

EDUCATION

California State University Long Beach, CA — *Mechanical Engineering*

August 2017 - June 2018

I attended CSULB for my freshman year of college, proudly joining their Honors Engineering Program to pursue Mechanical Engineering and completed several introductory EGR courses during my time there.

Northern Arizona University, AZ — *Computer Science*

August 2019 - June 2022

After leaving California State University Long Beach I attended Cuesta Community College for a year, taking general education classes while I reevaluated my major choice. After much deliberation I decided to attend Northern Arizona University to pursue my Bachelors of Computer Science. I intend to graduate in June of 2022.

Relevant Experience

Best Buy, CA — *Apple Master*

September 2018 - August 2019

During my time attending Cuesta Community College in San Luis Obispo, CA, I worked at Best Buy as a mobile sales representative. Doing so taught me how to communicate with clients as well as representatives from adjacent companies, as well as give unique insight into the world of technology and sales.

SKILLS

- Website Development
- Frameworks such as Flask and Bootstrap
- Image Processing using OpenCV
- Git/GitHub Operations

Projects

- Task automation in video games with pyautogui and OpenCV
- Portfolio website using GitHub pages and Bootstrap 4 (linked above)
- Social media keychain application

Interests

- Game development
- Machine learning
- Mobile application development
